Fall Protection Training in Alberta

There are high numbers of injuries at work connected to falling and a lot of fall-related deaths reported each year. Most of these instances might have been avoided with better training, better measures in place, and by correctly equipping staff before the potential for injury happens. The third leading cause of death in the workplace is due to lack of correct fall protection. This falls behind violence in the workplace and automobile accidents.

Fall-related accidents are the number one cause of death in the construction industry. The potential for fall accidents greatly increases based on the kind of work which is being done in your workplace. Hence, being familiar with the unique hazards which exist in your work environment and in your work situation can help you deal with dangerous situations and prepare for them before they occur as well as help you prevent fall injuries and deaths.

It is a good idea for your company to encourage regular workplace training and to encourage fellow workers to follow the precautions and to take them more seriously. Implementing an environment which encourages safety and training at all times could help you as well as your co-workers prevent expected accidents.

Following and implementing a regular safety program at work could help in order to prevent whatever possible safety related lawsuits and avoid a PR crisis for you company. By encouraging cooperation and respect from your foremen and personnel, issues can be avoided with workers' unions. The best reward would be that you will prevent your workers paying with their lives and or serious health situations that might have been avoided if the proper measures had been used.
