

## **Order Picker License Alberta**

Order Picker License Alberta - Order picking is likewise called order preparation operation. This is among the main processes within a warehouse and comprises people referred to as order pickers, taking and collecting articles in a certain quantity previous to shipment to be able to fulfill client orders. Order picking is a simple warehousing process. The efficiency in which this task is completed can be directly linked to the productivity of a supply chain. Thus, order picking is among the most controlled logistic processes. Order picking falls in the category of the warehouse management system.

There are some particular kinds of order picking. The main kinds include: wave picking method, pick to box method, piece picking or picker to part method, sorting systems method and zone picking method.

The pick to box method involves the order picker filling the box with the things from his or her station. The box then moves to other picking locations until the client order is done. In this particular technique, there is no movement of the order picker workers. In the wave picking method, the order pickers move around in order to collect the needed items for several orders. The picker to part method or piece picking is similar where the order picker or pickers move so as to gather the items required but for one order only.

There is no movement by the order picker in the sorting systems method. Rather, stuff are delivered to the orderpicker by an automatic system such as a conveyor system or an automatic storage system. In the zone picking method, each and every order picker is assigned to one specific area. They are responsible for only realizing order picking within this specified zone.
