

JLG Telehandler

JLG Telehandler Training Alberta - Following retirement in the late 1960's, John L. Grove started out on a cross country RV trip. After spending many years establishing his family built crane business with his brother, John had no idea that this trip would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road trip.

During their trip, John reacquainted himself with former business associates along the way. In combination with these conversations and a noteworthy event; two workers were unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a substantial marketplace for a product that could swiftly and safely elevate individuals in the air to accomplish upkeep and other building functions.

After their return from holiday, John set up a joint venture with two of his friends and purchased a metal fabricating business in McConnellsburg, Pennsylvania. Starting with a small crew of twenty staff, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates many of the basic design essentials of that original lift into existing designs.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fatefull cross-country journey and since the first JLG aerial platform entered the market. As of today, the company has extended itself into quite a few international marketplaces and continues to develop new machines to guarantee that customers are able to become safer and more resourceful within their workplace.
