Clark Forklift

Clark Forklift Forklift Training - Performing globally, there are currently 350,000 Clark forklifts and lift vehicles in operation, with in excess of 250,000 of those in commission in North America. Clark has five main lines of forklifts across the globe, making it one of the most expansive organizations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, duel fuel, gas, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift has 20 unique makes of forklifts, with components covering more than 120,000 specific components for all of its automated equipment. Your local Clark Seller is your total source for availability of all your parts requirements supplied by Clark Totalift.

Clark's exceptional Parts Distribution Facilities are conveniently situated in Louisville, Kentucky, which serves both their consumers and dealers in North America, and Changwon, South Korea, which handles their Asian dealers and consumers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing manufacturers. Driven to offer the highest level of value and service to our users, Clark remains on the cutting edge when it comes to enhancing productivity and benefiting performance.

Worldwide, Clark has one of the most impressive supplier support networks. With over 550 locations globally, supplier representation in over 80 countries and 230 locations in North America, their high level of dedication to their customers predominates the materials handling market.

Clark proudly remains an progressive leader of the material handling industry, revolutionizing protection features such as the operator restraint system. This exceptional dedication to safety is currently a customary feature on every lift truck.

Clark's relentless mission to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 — Clark, is the first forklift maker across the world to be certified with the internationally approved quality standard ISO 9001 for all of their production facilities. Furthermore, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be prepared for any environmental restrictions, thus placing them in a prevailing industry position.

Lean Manufacturing

Clark has chosen the structure of "Lean Production" at all of its assembly plants because this technique is particularly economical and allows for minimal use of resources. Developed to guarantee maximum efficiency, this system is intended to find and acknowledge the most efficient methods for manufacturing facility stewardship. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

Engine Design

Clark's product engineers and suppliers communicate together to develop the proficiency and brilliance of their products while minimizing costs. The new value engineering agenda combines modern product growth and delivers improved client support and service within the industry.
